

WALLACETOWN

Community Response Plan

Southland has **NO** Civil Defence sirens

(fire brigade sirens are not used to warn of
a Civil Defence emergency)

Please take note of natural warning signs as your first and best
warning for any emergency.

Wallacetown Community Response Plan 2019

Find more information on how you can be prepared for an emergency

www.cdsouthland.nz

If you'd like to become part of the Wallacetown Community Response Group
please email community@cdsouthland.nz

In the event of an emergency, communities may need to support themselves for up to 10 days before assistance arrives

Community Response Planning

The more prepared a community is the more likely it is that the community will be able to look after themselves and others. This plan contains a short demographic description of Wallacetown, information about key hazards and risks, information about Community Emergency Hubs where the community can gather, and important contact information to help the community respond effectively. Members of the Wallacetown Community Response Group have developed the information contained in this plan and will be Emergency Management Southlands first points of community contact in an emergency.

Demographic details

Wallacetown is a medium sized town located about 15 km north-west of central Invercargill. Due to its proximity to Invercargill, there are many interconnections between the two communities. Many people who live in Wallacetown commute to Invercargill and many people in Invercargill commute to the Wallacetown area, especially those working at the Alliance Lorneville plant.

- Wallacetown is contained within the Southland District Council area;
- Wallacetown has a population of approximately 663 and the town services a total population of about 2000;
- manufacturing is the largest industry of employment in the Wallacetown area;
- agriculture, construction, forestry and fishing are also significant employers;
- the broad geographic area for the Wallacetown Community Response Plan includes Waimatuku, Wrights Bush, Waianiwa and Ryal Bush. Refer to the map included in this plan for a more detailed indication;
- this is not to limit the area but to give an indication of the extent of the geographic district. Flexibility needs to be maintained considering that a specific disaster may render existing geographical boundaries irrelevant.

There is a risk of physical boundaries such as the Oreti river causing isolation if the river overflows or if bridges are damaged cutting access to the town. People west of Oreti, need to be able to support themselves and each other for up to 10 days following a major event.

Hazard and Risk information

Potential hazards and risks for the Wallacetown area include:

Flooding

- Wallacetown has historically been affected by flooding, including the 1978 and 1984 floods. It is surrounded by the Oreti and Makarewa Rivers which can cause potential isolation during a major flooding event. The town is at flood risk but stop banks in the area have helped to mitigate this risk.

Earthquake

- Like much of the South Island, the Wallacetown area would be affected during an Alpine Fault earthquake. The most likely impacts for Wallacetown would be loss of lifelines affecting communication, water supply, water waste disposal, rubbish collection, power and road and bridge disruption.

Road Infrastructure damage

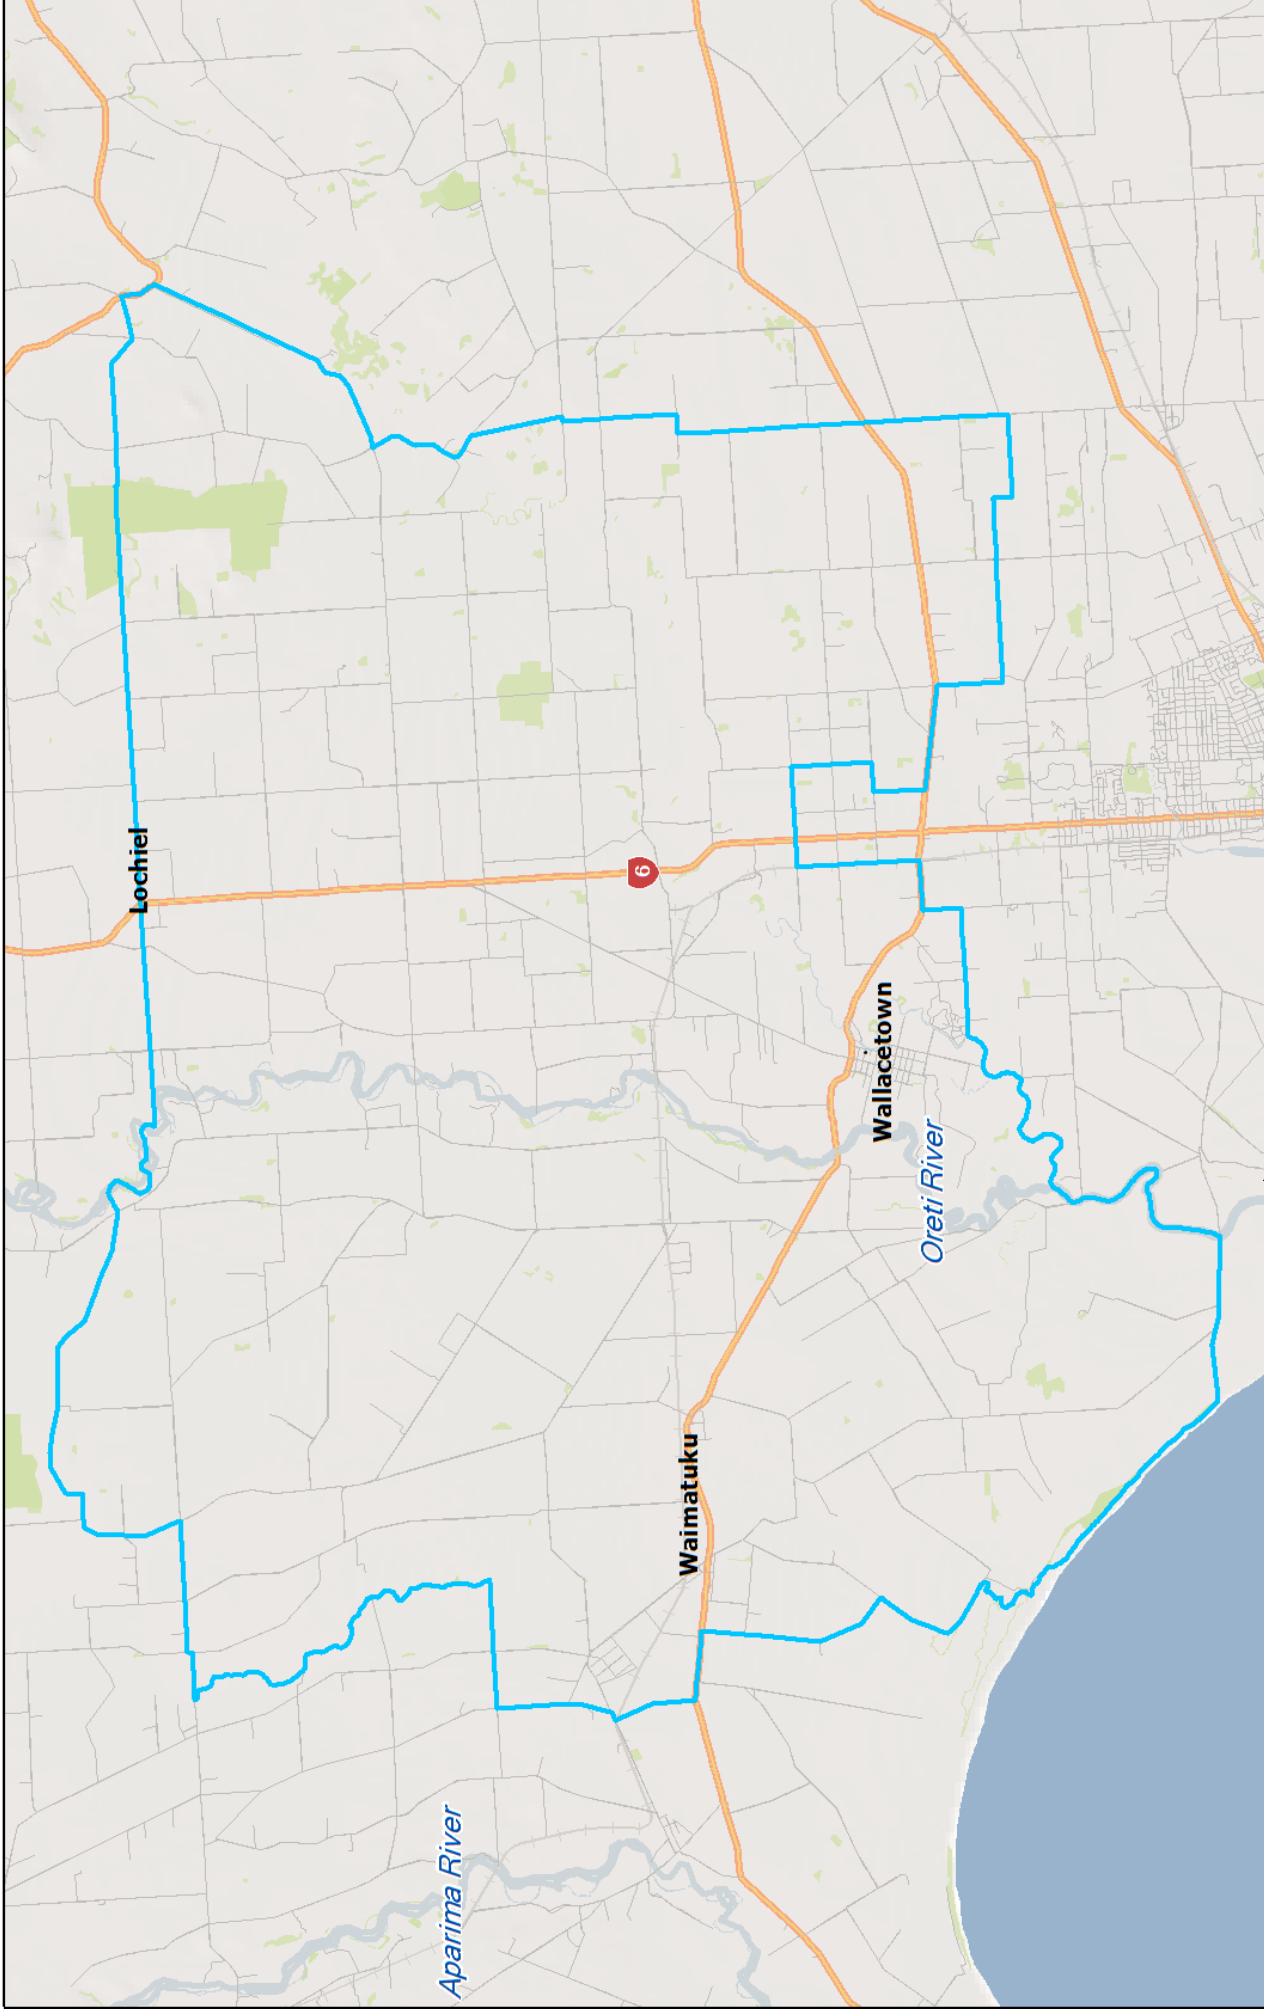

- Wallacetown is situated on SH99 and is a main thoroughfare for tourists and residents travelling between Riverton and Invercargill. The town provides industry and goods to surrounding areas and anything which may impact the delivery of goods to service the area needs to be considered.

Agricultural and biosecurity

- Wallacetown plays a role in supporting the local agricultural sector. Any impacts to livestock or land use could have major economic and health implications, especially around psychosocial impacts.

Identified potential vulnerable sub communities

- Schools: Wallacetown School (approximate roll - 64), and Waianiwa School (approximate roll - 46);
- Waianiwa Kindergarden (approximate roll - 25);
- Home based childcare providers;
- Elderly in the community;
- Rurally isolated people including migrant employees;
- People with disabilities;
- People with life threatening medical needs – the DHB and local medical centre can source this information if needed.

Community Emergency Hubs

Community Emergency Hubs provide pre-identified places where the community can gather in the event of an emergency. Not all Hubs will be suitable during an emergency, and it is up to the community to decide at the time. It is possible that a new venue will need to be found, but the concept of a location where the community gather is vital during a response as people seek immediate support, shelter, comfort and information.

Each pre-determined location will be provided with a hub guide and be able to access advice from Emergency Management Southland if they require further information or support.

In Wallacetown, Community Emergency Hub locations identified by the community are:

- Wallacetown Community Centre; 57 Dunlop Street, Wallacetown
- Waianiwa Community Hall; 268 Argyle-Otahuti Road, Waianiwa

Don't forget, if you are opening a hub you can bring some basic resources with you such as:

- Tea and coffee
- Milk and biscuits
- Toilet paper
- First aid kits
- Torches

Community Response Groups into Recovery

Community Response Groups will be vital during the recovery of a community. They will be able act as a connection between the community and the recovery team. They will have key local knowledge and understand the effects of decisions on the local community. They will be able to identify areas of the most importance to the community and suggest ways to work towards the community's end goals. The process around community recovery will be described in greater depth in the Southland Recovery Plan.
