Community Response Planning

In the event of an emergency, communities may need to support themselves for up to 10 days before assistance arrives. The more prepared a community is the more likely it is that the community will be able to look after themselves and others. This Plan contains a short demographic description of Tuatapere information about key hazards and risks, information about Community Emergency Hubs where the community can gather, and important contact information to help the community respond effectively. Members of the Tuatapere Community Response Group have developed the information contained in this plan and will be Emergency Management Southlands first points of community contact in an emergency.

Demographic details

- Tuatapere is contained within the Southland District Council area;
- Tuatapere area has a population of approximately 1,940, Tuatapere has a population of about 558;
- The area services agriculture, forestry, sawmilling and fishing with transport and manufacturing;
- The town has a medical centre, ambulance, police and fire service, Waiau Area school, and Hauroko Primary school in the district and preschool options;
- Fire service also has a station at Orepuki and Blackmount;
- The broad geographic area for the Tuatapere Community Response Plan includes lower south west Fiordland, Lake Hauroko, Lake Monowai, Blackmount, Clifden, Orepuki and Pahia, see map below for a more detailed indication;
- This is not to limit the area but to give an indication of the extent of the geographic district. Flexibility needs to be maintained considering that a specific disaster may render existing geographical boundaries irrelevant.
- Telecommunications within the areas can be patchy.

Hazard and Risk information

Potential hazards and risks for the Tuatapere area include:

Earthquake

- Fiordland region has frequent earthquakes and could be seriously affected during an Alpine Fault event. The most likely impacts for Tuatapere would be loss of lifelines, causing isolation with damaged buildings, roads, likely loss of communications, water supply, sewage and power. It could cause changes to the natural environment creating slips and affecting roading and possibly affecting waterways and underground water sources.

Tsunami

- Te Waewae Bay, Pahia and surrounding coastlines are at risk from a local, regional or distant source tsunami. Seismic activity southwest of Fiordland could cause tsunami that would reach the Southland coast within an hour. There may also be evidence of increased tidal flows up the Waiau River to Tuatapere. This could affect communities in this area including: Blue Cliff residents, coastal dwellings, beach users, white baiters and trampers on the Hump Ridge Track.
- If the tsunami is high enough, the coastal road may be affected.

Flooding

- Flooding can affect Tuatapere by cutting the township in two, isolating residents from general services, emergency services and medical services cutting access of tourists to travel along the scenic route and disrupt the delivery of essential goods.
- Bridges are vital infrastructure that also carry telecommunications, water and other services across rivers, these could also be impacted by flooding.
- Many areas in the community rely on bridges to connect with homes and employment this leads to isolated communities.

Storm

- High winds and storm damage can impact on infrastructure and roading, limiting access to townships. If the storm is severe enough, power can be lost to communities for days if damage is widespread and longer to areas that are remote.

Agricultural and biosecurity

- As Tuatapere and Orepuki support the surrounding farming communities, any impacts on livestock and farmland will have major long term impacts on the communities.

Identified potential vulnerable sub communities

- Schools – Hauroko Valley Primary School, years 1-8 (approximate roll 50-100), Waiau Area School, years 1-13 (approximate roll 100-150)
- Tuatapere Playcentre – licensed for 30 children
- Eastern Bush Playcentre,
- Elderly in the community particularly those still living in their own homes;
- People who are living alone;
- Rurally isolated people including migrant employees;
- People living in the remote areas of the district;
- People with young children;
- People with disabilities;

- People with high risk medical conditions – the medical centre can source this information;
- Tourists, Trampers, Hunters
- Home Based Childcare

Community Emergency Hubs

Community Emergency Hubs provide pre-identified places where the community can gather in the event of an emergency. Not all Hubs will be suitable during an emergency, and it is up to the community to decide at the time. It is possible that a new venue will need to be found, but the concept of a location where the community gather is vital during a response as people seek immediate support, shelter, comfort and information.

Each pre-determined location will be provided with a hub guide and be able to access advice from Emergency Management Southland if they require further information or support. In Tuatapere and the surrounding area, Community Emergency Hub locations identified by the community are:

- Waiau Town & Country Club, 41 King Street, Tuatapere 9620.
- Last Light Lodge Café and Backpackers, 2 Clifden Highway, Tuatapere.
- Pipe Band Hall, Main St, Tuatapere.
- RSA Hall, Main Street, Tuatapere
- Waiau Valley Presbyterian Church, 63 Main Road, Tuatapere.
- Orawia Community Centre, Ohai-Clifden Hwy.
- Blackmount Community Centre, Blackmount Redcliff Rd.
- Orepuki Tavern, Dover St, Orepuki.
- Western Southland Gun Club, Pukemaori-Tuatapere Highway.
- Clifden Hall, 1176 Clifden Highway, Clifden
- Tui Base Camp, 4 Mcfeely Street, Tuatapere

Community Response Groups into Recovery

Community Response Groups will be vital during the recovery of a community. They will be able act as a connection between the community and the recovery team. They will have key local knowledge and understand the effects of decisions on the local community. They will be able to identify areas of the most importance to the community, and suggest ways to work towards the communities' end

goals. The process around community recovery will be described in greater depth in the Southland Recovery Plan.

Additional areas

As Tuatapere covers a wide area consideration should be given to those communities that are lying distant to the township, communication with those communities can be achieved by existing radio communication networks such as using local rural transport firms radio communications networks.
